DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claim 1-3, 5 and 7-9 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claim 6 recites the limitation "the voltage/current converter" in line 8 and "the DC current gain" in line 9. There is insufficient antecedent basis for these limitations in the claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

6. Claims 1, 5, and 7-9 are rejected under 35 U.S.C. 102(a) as being anticipated by Thompson et al. US Patent No. 6,873,211.
7. Regarding the claims, Thompson discloses a multi-mode bias circuit for power amplifiers used in a communications device including a power amplifier (304) including a transistor (314) with a control electrode coupled through an inductor (306) to the bias circuit (350). Bias circuit

Art Unit: 2817

(350) includes a controlled current source (354), which is enabled by mode control (352) to provide bias current. See figure 3 and corresponding text.

8. Regarding claim 7, Thompson discloses, power amplifier (304) can have any number of stages. See column 4, lines 39-42..

9. Regarding claim 8, Thompson discloses power amplifier (304) arranged to amplify high frequency signals. See column 2, line 60 - column 3, line 3.

Allowable Subject Matter

10. Claim 4 is allowed.

11. Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
